NOVSEATTLE CENTER15TH305 HARRISON ST.6PMSEATTLE, WA 98109

ABOUT THE SERIES

The architecture of Seattle has a spectrum of influenes: tradition, available technology, materials, climate, economics, and changing aesthetic considerations. It's a place where one will find almost every style of architecture imaginable. In recent years, the city has seen an abundance of creative and thought provoking projects by top architects.

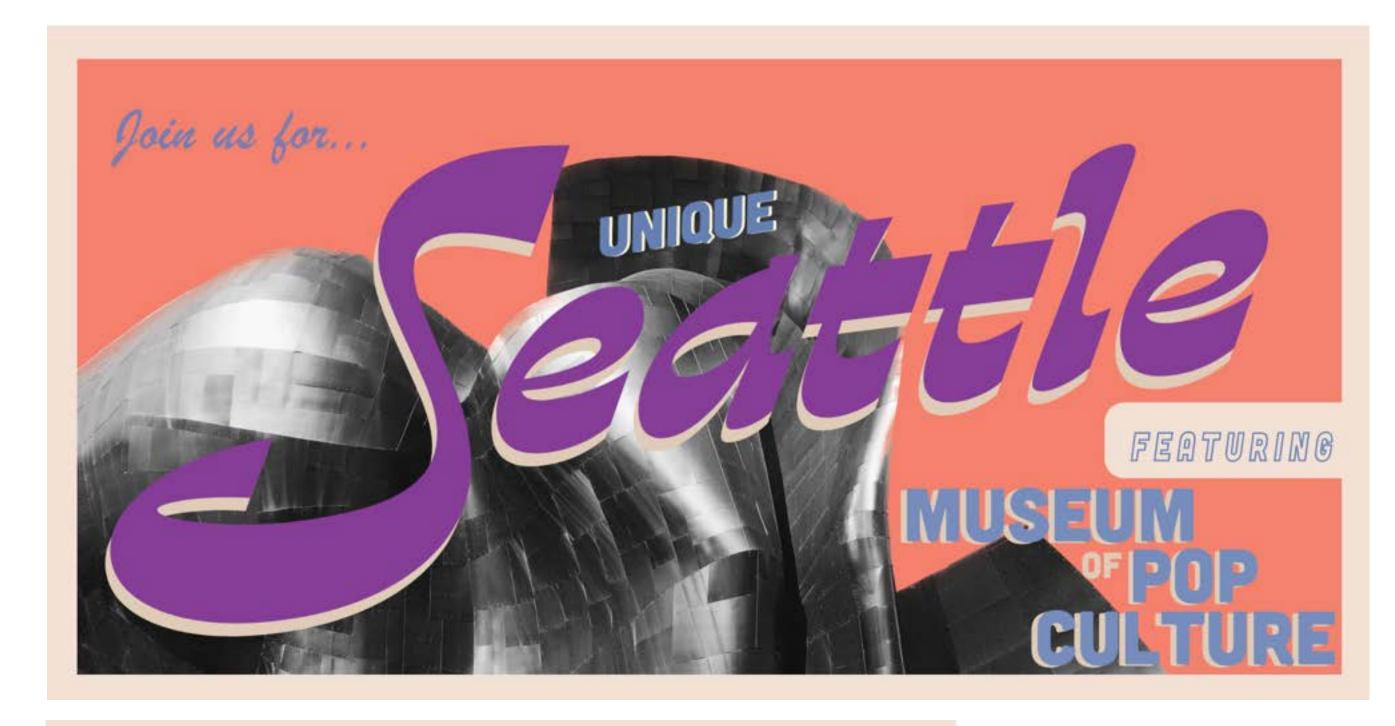

This series focuses on three world-renowned architects and their award winning projects in the city. As diverse as they are intriguing, these masters will give insight into their creative process and provide a backdrop for the thinking that went into their dynamic Seattle designs.

Rem Koolhaas is a renowned Dutch archiect and thinker, born on November 17, 1944. As the founding partner of the globally acclaimed architecture firm OMA (Office for Metropolitan Architecture), he has left an indelible mark on the world of design and urban planning. Koolhaas is celebrated for his groundbreaking architectural projects, including the Seattle Public Library and CCTV Headquarters in Beijing, which challenge conventional norms. His innovative ideas, encapsulated in books like "Delirious New York" and "S, M, L, XL," continue to reshape architectural discourse. Koolhaas's multidisciplinary approach and visionary thinking have earned him prestigious awards, making him an influential figure in the field. Unique Seattle 3307 3rd Ave W Seattle, WA 98119

This series focuses on three world-renowned architects and their award winning projects in the city. As diverse as they are intriguing, these masters will give insight into their creative process and provide a backdrop for the thinking that went into their dynamic Seattle designs.

Frank Gehry, born on February 28, 1929, in Toronto, Canada, is an iconic architect renowned for his groundbreaking and visionary designs. With a career spanning over six decades, Gehry has pushed the boundaries of architectural innovation. His distinctive and fluid architectural style, characterized by curvilinear forms and the use of unconventional materials, has left an impressive mark on the world's architectural landscape. Notable works include the Museum of Pop Culture in Seattle, the Walt Disney Concert Hall in Los Angeles, and the Fondation Louis Vuitton in Paris. Gehry's work has earned him numerous awards, including the prestigious Pritzker Prize in 1989. His legacy continues to inspire architects and enthusiasts worldwide. ABOUT THE SERIES

The architecture of Seattle has a spectrum of influenes: tradition, available technology, materials, climate, economics, and changing aesthetic considerations. It's a place where one will find almost every style of architecture imaginable. In recent years, the city has seen an abundance of creative and thought provoking projects by top architects.

This series focuses on three world-renowned architects and their award winning projects in the city. As diverse as they are intriguing, these masters will give insight into their creative process and provide a backdrop for the thinking that went into their dynamic Seattle designs.

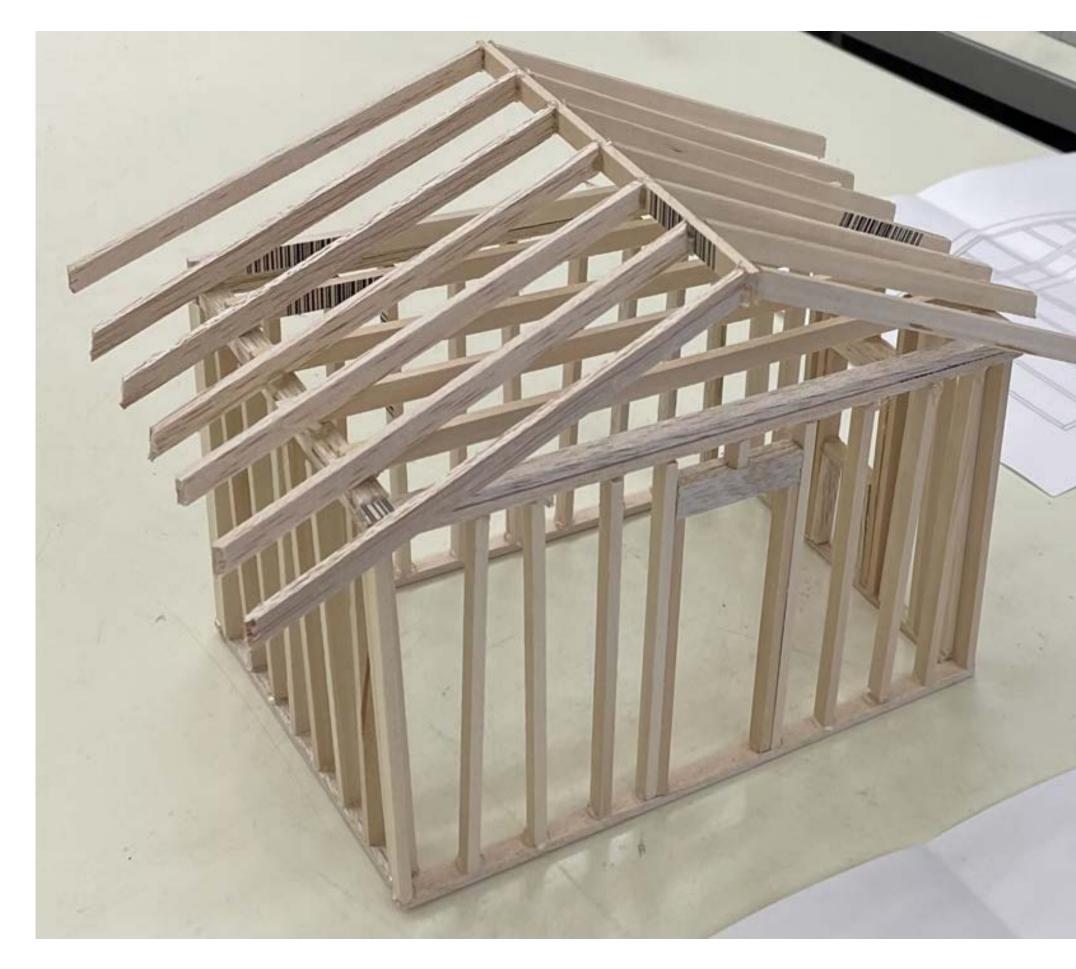

Steven Holl, born on December 9, 1947, in Bremerton, Washington, is a visionary American architect celebrated for his poetic and contextual designs. With a career spanning several decades, Holl has consistently pushed the boundaries of architecture. His work is characterized by a deep appreciation for light, materiality, and space, resulting in structures that engage with their surroundings in unique ways. Prominent projects include the Chapel of Saint Ignatius in Seattle, the Nelson-Atkins Museum of Art Bloch Building in Kansas City, and the award-winning Hunters Point Community Library in New York. Holl's commitment to sustainability and innovative design has earned him numerous accolades, including the AIA Gold Medal in 2012, solidifying his status as a luminary in the world of contemporary architecture.
